

April 11, 2018

The Honorable Lamar Alexander Chairman Senate Health, Labor, Education & Pensions Committee 428 Senate Dirksen Office Building Washington, DC 20510

Dear Chairman Alexander,

On behalf of the 40 undersigned organizations, the Nursing Community Coalition offers the following comments in response to the draft legislation, *The Opioid Crisis Response Act of 2018*. The members of the Nursing Community Coalition are the cross section of education, practice, research, and regulation within the nursing profession. With over four million licensed registered nurses, Advanced Practice Registered Nurses (APRNs), and nursing students, the profession embodies the drive and passion to continually improve care for patients, families, and communities. The coalition is committed to improving the health of our nation, and we applaud the committee for continuing to take policy measures that will help curb the opioid epidemic. Our comments specifically refer to reducing practice limitations on the country's 381,000 APRNs (including 248,000 nurse practitioners, 70,000 clinical nurse specialists, 52,000 certified registered nurse anesthetists, and 11,000 certified nurse-midwives) which would increase access to care.<sup>1</sup>

The coalition has previously supported the Addiction Treatment Access Improvement Act (H.R. 3692/S. 2317) which expands the Controlled Substances Act (21 U.S.C. 823 (g)(2)(G)) and would allow all APRNs to provide Medication Assisted Treatment (MAT). Additionally, the coalition supports a similar provision in the newly introduced CARA 2.0 Act of 2018. Section 7.0 of CARA 2.0 expands the Comprehensive Addiction and Recovery Act of 2016 (Public Law 114-198) to allow all APRNs to prescribe MAT. Both of these pieces of legislation would create a permanent solution so that the country's APRNs would be able to use their clinical training to help combat this national crisis.

The coalition urges the Committee to use provider-neutral language and incorporate all APRN roles in *The Opioid Crisis Response Act of 2018,* as specified above, as a way to expand access to care for patients suffering from opioid addictions. Opioid use and dependence are growing public health threats, despite the many actions put in place to try to end this crisis. Every day, approximately 115 people die from opioid overdose<sup>2</sup>; APRNs are critical agents in treating these patients and are sometimes the sole providers of this care in regions that struggle to recruit and retain providers.

Thank you for your consideration of these comments on the draft of *The Opioid Crisis Response Act of 2018*. If the Nursing Community Coalition can be of any assistance to you or your staff, please do not
